

HOW MUCH IS THAT DEVOPS IN THE WINDOW?

Bridget Kromhout

DRAMAFEVER

@bridgetkromhout

Tech Recruiters

Critiques from
first-time
attendees:

“on the outside
looking in”

“not enough was
actionable”

@bridgetkromhout

Learnings:

- Focus on specific actions
- Discuss how they make you feel
- Feedback is a gift

you are in a maze of twisty little buzzwords

Welcome to Colossal Adventure, the first of the Jewels of Darkness, copyright (C) 1986 Level 9 Computing. (This version allows you to use RAM SAVE and RAM RESTORE to save a position in memory, and OOPS to "take back" bad moves). You are standing beside a small brick building at the end of a road from the north. A river flows south. To the north is open country and all around is dense forest.

What now?

@bridgetkromhout

kitteh not unicorn

you're not going to do devopsdays wrong

hallway track: talk to people!

twitter: #devopsdays

open space: deep dive on specific topics

evening event: making connections

if you know people already: your job is to
welcome new people!

**“The single strongest signal that you
have something to learn...**

**...is that a
difference exists.”**

Owner

+1

- figure out that having the print shop cut the cards is optimal
- update readme clarifying same
- ???
- not actually profit

bridgetkromhout self-assigned this just now

DevOps is culture, Twitterverse. Anyone who says differently is selling something.

~~DEVOPS~~ EMPATHY

“Empathy allows the developer to understand why the sysadmin craves reliability and doesn’t want the site to go down, and it allows that same sysadmin to realize why the developer needs to release all those shiny new features.”

--Katherine Daniels

DevOps

“...it’s not about making developers and sysadmins report to the same VP. It’s not about automating all your configuration procedures. It’s not about tipping up a Jenkins server, or running your applications in the cloud, or releasing your code on Github. It’s not even about letting your developers deploy their code to a PaaS. The true essence of DevOps is empathy.”

Jeff Sussna, “[Empathy: The Essence of DevOps](#)”

@bridgetkromhout

Forget hipster
DevOps versus
enterprise
DevOps.

The DevOps in the
window is just
DevOps, and it's
not for sale.

@bridgetkromhout

Thanks, @devopsdaysChi!
